

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

# THE GEOGRAPHICAL REVIEW

## CONTENTS FOR MAY, 1918

The Geographical Distribution of the Balkan Peoples. By Jovan Cvijić. (1 insert map in color) . . . . .	345
The Islands of Juan Fernandez. By Carl Skottsberg. (1 map, 19 photos) . . . . .	362
The Growth of American Cities. By Lawrence V. Roth. (3 diagrs.) . . . . .	384
Some Influences of the Sea upon the Industries of New England. By Malcolm Keir . . . . .	399
The "Old-Fashioned" Winter of 1917-18. By Charles F. Brooks . . . . .	405
Geographical Record . . . . .	415

### *American Geographical Society*

Presentation of the Cullum Geographical Medal to Professor Frederick H. Newell: Meetings of April . . . . .	415
---	-----

### *North America*

The Biogeographical Contrast between the Coastal Plain and the Piedmont . . . . .	416
Spring Cold Spells in New England . . . . .	417
The Forests of the Isthmus of Panama . . . . .	417

### *Europe*

Franco-Italian and Franco-Swiss Ports in France . . . . .	418
The Internal Migrations Underlying the Present Distribution of the Serbo-Croats . . . . .	418

### *Africa*

Commandant Tilho's Explorations in the Tibesti Region, 1912-17 . . . . .	419
Rubber Cultivation in East Africa . . . . .	420
The Meteorological Station on the Island of Mauritius . . . . .	420

### *Educational Geography*

Economic Geography in the High School . . . . .	421
---	-----

### *Geographical News*

Geographical News . . . . .	421
Personal . . . . .	422

Geographical Publications . . . . .	423
-------------------------------------	-----

Published monthly by the American Geographical Society

Broadway at 156th Street, New York, N. Y.

Price, fifty cents a number

Five dollars a year

Entered as second-class matter, January 22, 1916, at the Post Office at New York, N. Y., under the act of August 24, 1912

Press of Douglas Taylor & Co., New York

## OUR CONTRIBUTORS

Professor Cvijić is the foremost geographer of Serbia. He is professor of geography at the University of Belgrade. Since the invasion of his native land he has been residing in Paris, where he is giving courses at the Sorbonne. Professor Cvijić's numerous researches deal with both the physical and the human geography of the Balkan Peninsula. Among the latter may be mentioned a ten-volume series entitled "The Population of the Serbian Lands" (Acad. of Sciences, Belgrade, 1902-14), published in collaboration with his students, which stresses the importance of the internal migrations of the South Slavs as the key to an understanding of their present distribution and condition (see p. 418 of this number). Professor Cvijić's name is pronounced Tzviyity—to use the system of transliteration applied to the map accompanying his article—in which the *ty* represents the sound of *t* in a careful pronunciation of "creature".

Dr. Skottsberg is a Swedish plant geographer of note. He is assistant professor of botany at the University of Upsala. He has specialized mainly in the phytogeography of sub-antarctic regions, notably the Straits of Magellan and southernmost Patagonia, for which his connection with the Swedish Antarctic Expedition of 1901-03 and the Swedish Magellanic Expedition of 1907-09 furnished the material. Dr. Skottsberg is the author of numerous scientific papers and a general account of the 1907-09 expedition entitled "The Wilds of Patagonia" (London, 1911).

Dr. Keir is assistant professor of industry at the Wharton School of Finance and Commerce of the University of Pennsylvania. Dr. Keir is the author of "Fisheries: An Example of the Attitude Toward Resources" (*Bull. Amer. Geogr. Soc.*, Vol. 44, 1912); "Modern Korea" (*ibid.*, Vol. 46, 1914); "The Causes for the Growth of Philadelphia as an Industrial Center" (*Bull. Geogr. Soc. of Philadelphia*, Vol. 13, 1915); "Some Responses to Environment in Massachusetts" (*ibid.*, Vol. 15, 1917).

Mr. Roth is an assistant in history at Harvard University, where he has been specializing in the geographical basis of that subject. He has also been giving courses at the State Normal School of Salem, Mass.

Dr. Brooks is instructor in geography at Yale University and the author of several papers on meteorology and geography, including "The Snowfall of the United States" (*Quart. Journ. Royal Meteorol. Soc.*, London, 1913); "The Snowfall of the Eastern United States" (*Monthly Weather Rev.*, Vol. 45, 1915); "New England Snowfall" (*Geogr. Rev.*, Vol. 3, 1917); "Island Nantucket" (*ibid.*, Vol. 4, 1917).
